Often used for tank linings and industrial cutting boards, HDPE polyethylene offers the excellent moisture resistance of LDPE with a higher-density, firmer construction. It also resists most chemicals, such as alcohols and ethers.

View [detailed performance properties for plastics](#).

Also known as starboard, these sheets won't degrade when exposed to salt water, humidity, and UV light. They have a textured finish that won't show scuffs or scratches. Width and length tolerances are  $\pm 1/16$ ". These sheets are an excellent electrical insulator. They're also FDA compliant and meet UL 94HB for flame retardance and ASTM D4976.

Thickness	1/4"
Thickness Tolerance	$\pm 0.013$ "
Color	White or black
Maximum Temperature	180° F
Tensile Strength	Poor
Impact Strength	Good
Additional Specifications	Marine-Grade Sheets Black 24" x 24"
